Education

Bachelor of Software Systems, Kaunas University of Technology

2022 – Present

- Fintech track
- International Erasmus exchange, University of Bologna (Spring 2025)

Kaunas, Lithuania

Projects

TimeTracker

- Designed upon real-world request to help managing and tracking project work hours; deployed and actively used
- Built a secure backend with **C# .NET 8 Web API**, implementing modular services, repositories, and a **JWT authentication, Google Login**
- Implemented **automated email workflows** with temporary tokens for account confirmation and password resets (Zoho SMTP)
- Developed frontend with **React + Typescript**, with clean, responsive UI, and data visualization using **Recharts**.
- Deployed to a remote **Ubuntu server** with persistent **MySQL database, nginx reverse-proxy**, and background service management.

Portfolio OS

- Built an interactive personal portfolio website, simulating a desktop operating system
- Features draggable windows, dock navigation, and a working terminal (used Xterm)
- Built with **React, Next.js**, and **Tailwind CSS**, deployed to a remote **Ubuntu** server with **nginx**

Karate Tournament System

- Built a tournament management system with features for match entry, bracket visualization, and result tracking using **Node.js** and **Express.js**
- User tested and successfully deployed the system in real local club tournaments
- Improved administrative efficiency by 60%, and paper usage decreased by 90%

Skills

Languages

JavaScript (Typescript),
Python, C#, Java, SQL

Frameworks & Libraries

React, Next.js, .NET 8
ASP.NET Core, Entity
Framework Core, Express.js,
Recharts, Jest

Tools & Platforms

Git, Node.js, Docker,
systemd, nginx, Zoho SMTP,
MySQL

Courses

Udemy (2023-2025)

Modern React with Redux Bootcamp; Web development with JS Bootcamp, JavaScript - advanced concepts; Complete Python Pro Bootcamp
